New Appointment System success - Thanks to You!

The Surgery has moved to a system where all appointment requests are triaged by a doctor and patients are encouraged to make requests via an online form on the Surgery's website wherever possible. Most patients are now making appointment requests online, which has eased the pressure on the phone line and resulted in the call waiting time reducing by around 80% on what it was a year ago. This helps all patients contacting the Surgery.

Please make appointment requests via the online form if you can and call if you cannot.

They're currently exploring how the building could become a more welcoming, accessible, and inclusive community space — a place where local people can connect, take part in activities, access support, or simply enjoy being together.
